TESTIMONIALS

"Barnard Construction is very pleased with Northeast Concrete and will continue to use them for years to come." -Cody Hook, Barnard Construction

"My company has been doing business with Northeast for some time & I personally have been working with them over the last four years. John has been exceptional to work with. He prices projects accurately, always has material on site and is always able to turn around custom projects in a timely manner. It has been a pleasure working with Northeast and I look forward to working with them on future projects"
-Patrick Grimes, Cambell Foundry

THE RECON WALL SYSTEMS

Recon Retaining walls are a high-performance retaining wall system with the look, scale and durability of massive stone. Recon big block retaining walls are fast becoming the product of choice for a wide variety of commercial and residential retaining walls. They are efficient and easy to install. They can be completed in a variety of textures and colors to enhance the aesthetic of any property. The Recon Retaining Wall System is made from wet cast concrete specifically designed to withstand the adverse effects of freeze thaw cycles, brackish water and storm water runoff. Recon has the industry's leading gravity retaining wall system. Recons large retaining wall block can be engineered for unreinforced gravity retaining walls reaching height in excess of 20'.

WE ARE WITH YOU EVERY STEP OF THE WAY!

Here at Northeast Concrete Products, we pride ourselves on our excellent customer service well as providing knowledgeable, friendly support & quality products. Our main goal is to guide our customers from the start of their project to the finished product.
